DATA CENTRE

WWW.WEBWORLD.IE

ABOUT US

23 YEARS
EXPERIENCE

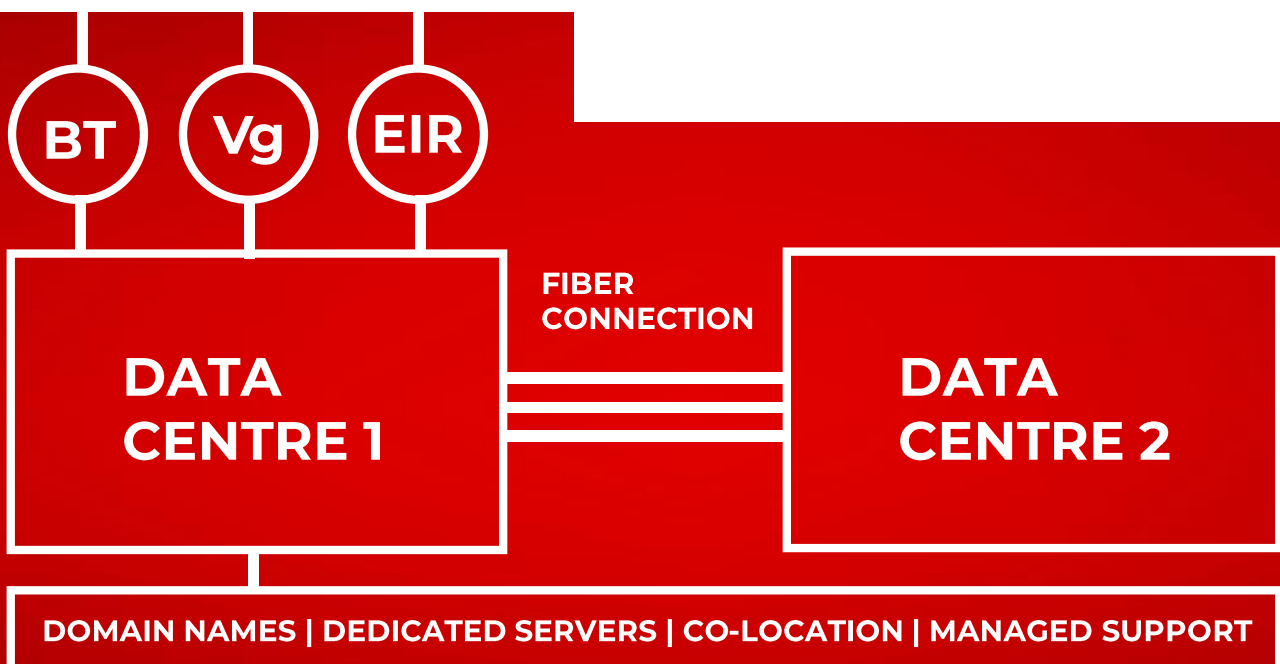

We are an Irish owned company who run 2 data centre's here in Dublin. We have 23 years experience in providing tailor-made solutions to meet the highest demands of our clients. Our efficient, fully secure and flexible infrastructure features some of the most advanced Data Centre capabilities in the industry.

We back this up with a 99.99% uptime guarantee and 24/7 customer support availability to look after your mission critical IT systems.

WHAT WE DO

We offer a wide range of custom solutions to suit each and every client and they are all fully scalable.

No data Centre in Ireland can match our professional personal service or value for money.

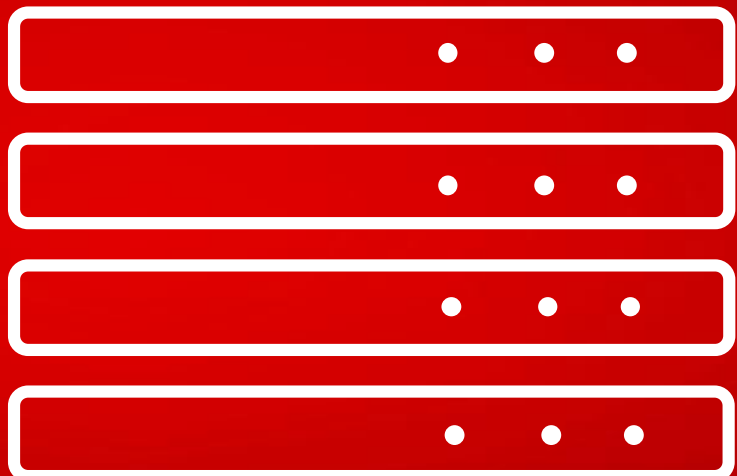

POWERED VIA 100% RENEWABLE ENERGY

Our energy supplier is Ireland's greenest energy provider. As a result, we use 100% sustainable green energy in our data centres.

Our current rating is estimated at 1.5 and by implementing the latest technology and practices we are aiming to achieve a rating of 1.

This means that most of the energy delivered to our data centre is used for computing purposes and wasteful supplementary activities are eliminated.

Our goal is to reduce our energy use and carbon footprint, improve our PUE Rating, improve our staff and public health, try and attract more green conscious customers. We have implemented as many changes to our operations as we can and continue to review this on an ongoing basis.

ICANN ACCREDITATION

HUNDREDS OF
DOMAIN
EXTENSIONS
AVAILABLE

We are delighted to announce that we are now an ICANN accredited domain registrar, becoming only the 4th accredited registrar in Ireland.

The company has received this accreditation after demonstrating that it meets all the technical, operational and financial criteria necessary to qualify as a domain registrar.

This will also help give extra assurance to prospective partners that we have the necessary expertise to service their domain requirements no matter what it is.

The ICANN accreditation will allow us to deal with Global Top Level Domain(gTLD) registries to ensure we can provide our customers with the best possible value and options that are available.

.IE DOMAIN REGISTRATION

I R E L A N D S
M O S T P O P U L A R
E X T E N S I O N

GUARANTEED IRISH CONNECTION

.ie reflects the relationship between your online activity and Ireland. .ie websites have a guaranteed Irish connection and are most suitable to maximize your marketing efforts in Ireland.

VISITORS CONFIDENCE

The criteria for owning a .ie domain is stricter. Every .ie domain is verified to ensure that the people behind it are who they say they are. With a .ie domain you know who you are dealing with

RANKED HIGHER IN GOOGLE.IE

.ie domains are ranked higher than other domain names when searching with Google.ie and other Irish search engines.

SAFER

.ie domains have lower instances of cybercrime and are known as one of the safest domains in the world.

We have experienced and professional staff to assist you with a registration, transfer or renewal request. If you are unsure about what documentation needs to be included, our Registration Service Team will be happy to assist you.

CO-LOCATION

FULLY FLEXIBLE
& SCALABLE SOLUTIONS

SCALABLE SOLUTIONS

FLEXIBLE POWER OPTIONS

- Cabinet dimensions:
L:600mm - P:1000
- Lock and security:
Confined cabinet with security key
- Electric power type:
Double redundant
- Electric power tension:
2 x 220V
- Electric power amperage:
2 x 14A per rack

Each cabinet supports high-density configurations, which means that you never have to settle for a deployment that is not optimal for your business. We allow you to turn-up or turn-down the amount of computing power you buy.

PAY AS YOU GO

We are designed to scale with you as your needs evolve. Ideal for any business with unique data centre requirements.

- Multiple transit providers included (Hurricane Electric, Cogent, Eir Virgin)
- 99.9% network uptime
- DDoS protection
- 10Gbps ports available

Optional Extras:

- Hardware firewall protection
- Remote reboot box
- KVM over IP
- Weekly off-site backups
- Server monitoring
- Extra power point

FROM Qtr.

TO FULL-RACKS

We are dedicated to support your business with top class Data Centre Solutions tailored to meet your specific requirements

A photograph of a server rack filled with various server units. The units are black and silver, with some having labels like 'araxxe' and 'Dual X5560 72gb'. A large red rectangular overlay covers the right side of the image, containing white text. The text reads 'DEDICATED SERVERS' in large, bold, sans-serif font, and 'BUILT IN-HOUSE' in a smaller, bold, sans-serif font below it. The server units are densely packed, showing multiple bays and components.

POWER & COOLING

INFRASTRUCTURE

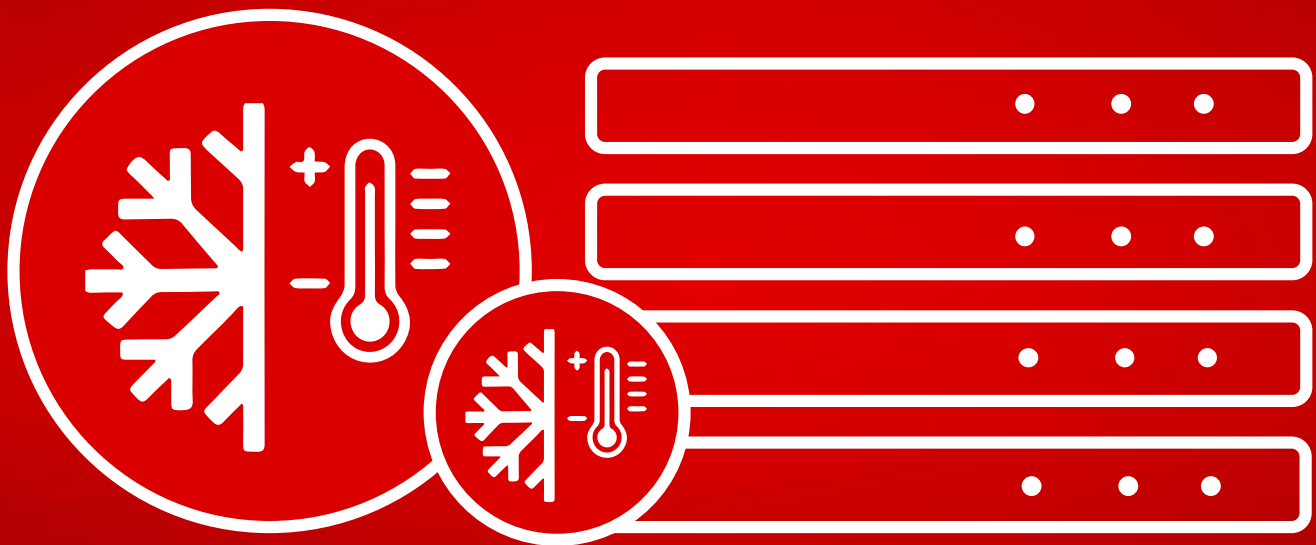

BACKUP POWER & CLIMATE CONTROL

We have back-up generators to ensure there is uninterrupted operations in the event of an outage for our customer's critical systems.

Our robust cooling infrastructure with software constantly monitoring & controlling the air temperature and humidity guarantee perfect environment to keeping all servers at the correct temperature.

Web World deploy cabinet line ups in hot and cold aisle line ups so that hot exhaust air and cold intake air remain isolated from one another.

- Air cooled facility
- Back up UPS & Diesel generator
- CCTV recording and 24/7 on-site security
